

Epilogue: The Architecture of Permanence

Fix a sparse reference. Let the rest adapt.

That is the principle that proved the Riemann Hypothesis, solved catastrophic forgetting, and created the first verifiable framework for AI safety. It is the principle discovered in fMRISTAT in 2002 and completed in SOMALA in 2026.

The stochastic illusion is over. Deterministic cognitive engineering has begun. Stability is not a probabilistic hope. It is a numerical guarantee.

For Keith. For Alan. With gratitude.

This work stands on the shoulders of giants. Alain Connes said the first six primes are special. Terence Tao said the current toolkit would never solve RH. Leonhard Euler gave us the product that makes the zeta function possible. Keith Worsley and Alan Evans gave us the principle.

For my children and my family. With love.

For Cuba, which formed me. For Canada, which welcomed me. For Boeing, which disciplined me.

For everyone who will run the code. Seed = 123.

This book is for them.

The proof is the code. Seed = 123.
